

WIRE CONVEYOR BELTS

Wire conveyor belts were introduced to achieve the need of transporting items through conditions that are beyond the capabilities of conventional conveyor belts, where heat ranges from -50 up to 1100 degrees or where a good drainage is required. Tegman's wire conveyor belts are available in a number of weaves.

Balance Weave

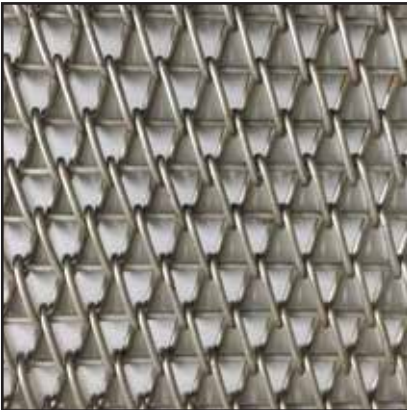

Flat Spiral Weave

Cord Weave

Duplex Weave

Honey Comb

Ladder Belt

Wire conveyor belts are available in the following materials:

- Mild Steel
- Galvanized Steel
- SS304
- SS316

Other materials are available on request.

Belt Finishing

The following edge finishing is available:

- Welded Edge
- Honey Comb Edge
- Ladder Edge - Tegman supply rollers and sprockets in Nylon and Stainless Steel
- Chain Edge - Many types of chain are available, sprockets to suite are also manufactured.
